TaipeiPLAS 2026 | FCS Unveils 1000-Ton Smart Manufacturing Solutions

As large-part molding evolves, space efficiency and productivity are key. At TaipeiPLAS 2026, FCS will showcase the **SA-1000 outward toggle injection molding machine**, featuring a 17% shorter machine length and 18% longer mold-opening stroke with automated plastic stool molding in a 50-sec. cycle.

Also on display are the **SA-160 AI smart injection molding machine** and **CT-120 all-electric low-carbon injection molding machine**, featuring AI quality prediction, mold water control, and energy monitoring. All machines connect to iMF 4.0 for smarter...

FCS is expanding into **MLPC multilayer solid capacitors**, targeting AI servers, GPUs, CPUs, and other high-end applications. Moving beyond injection molding equipment, FCS is entering electronic components to build a new growth engine...

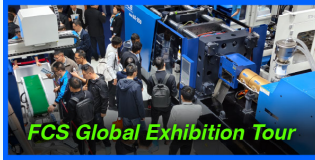

[Read more](#)

FCS expands from multi-component molding and MuCell lightweighting to smart manufacturing services, **with over 1,000 machines worldwide running on iMF 4.0**, supporting FCS's...
